Ext. 103

The Estancia Basin Water Planning Committee (EBWPC) is requesting your help to forecast future water availability in the Estancia Valley.

The EBWPC needs access to irrigation wells for the purpose of monitoring water table levels in different areas of the Estancia Valley.

The EBWPC will not be monitoring the amount of water being pumped, only the water level changes associated to irrigation and recharging from rain and snow.

The EBWPC is currently monitoring approximately 60 wells; however, we need additional wells to monitor in the southeast and northeast parts of the Estancia Valley.

The monitoring is done by a Qualified Professional company. There is **no cost** and the data will be made available to you.

Please **call the number above** to find out how you can help the EBWPC continue the planning for the Estancia Valley's water future.
